CAREER OBJECTIVE

Results-driven MCA graduate specializing in Big Data Analytics with hands-on expertise in Python, Django, and REST API development. Currently contributing as a Python Django Intern, building scalable backend systems and database-driven applications. Seeking a backend or full-stack developer role where I can apply my skills in web development and data-driven application design to deliver impactful software solutions.

KEY SKILLS

Programming	Frameworks & Tools	Databases	Web Technologies
Python, Java (Basic)	Django, DRF, REST APIs, Git, GitHub, Postman	MySQL, SQLite	HTML, CSS, JavaScript

INDUSTRY EXPERIENCE

Python Django Intern | **BrainyBeam Info Tech Pvt. Ltd.** | *Jan 2026 – Present*

- Designed and developed backend modules using Python and the Django framework for live client projects.
- Built and tested RESTful APIs using Django REST Framework (DRF) and validated endpoints via Postman.
- Developed database-driven applications with optimized schema design and query performance using SQLite and MySQL.
- Collaborated on full project lifecycle — from requirement gathering and development to debugging and deployment.
- Improved database query efficiency by identifying bottlenecks and implementing optimized ORM queries.

TEACHING EXPERIENCE

Computer Educator | **Genius Computer Academy** | *Jul 2024 – Oct 2024*

- Delivered hands-on training in MS Office (Word, Excel, PowerPoint), Python, PHP, and Java to 20+ students.
- Explained core programming fundamentals and guided students in building practical web and desktop projects.
- Designed structured lesson plans covering both theory and real-world coding exercises for beginners.

PROJECTS

Billing Assistant — Billing Management System *Python | Django | SQLite | HTML | CSS*

- Built a full-stack Django billing application for small businesses to create, manage, and track invoices efficiently.
- Developed backend modules for product, customer, and billing management with a structured relational database schema.
- Implemented dynamic invoice generation with automated calculations for totals, taxes, and discounts.
- Added Paid/Unpaid payment status tracking with real-time record updates for improved financial oversight.
- Designed a clean, user-friendly interface enabling seamless data entry, invoice retrieval, and report viewing.

Bharat Express — Courier Management System *PHP | MySQL | HTML | CSS | JavaScript*

- Developed a full-stack courier booking and shipment tracking system with end-to-end order management.
- Implemented role-based authentication with separate Admin and Customer dashboards for access control.
- Built an Admin panel featuring courier status updates, booking management, and shipment history reporting.
- Designed a responsive frontend using HTML, CSS, and JavaScript for a smooth cross-device user experience.
- Structured and optimized the MySQL database schema to handle bookings, routes, and delivery statuses efficiently.

Farma Assist — Farmer Digital Assistance Platform *Hackout'24 | DA-IICT Hackathon*

- Developed a digital platform to support farmers with tools for crop guidance, market pricing, and resource planning.
- Designed and prototyped the solution within a competitive hackathon environment at DA-IICT, Gandhinagar.
- Focused on user-centric design to make digital tools accessible for rural farmers with limited tech exposure.

ACHIEVEMENTS

- Hackout'24 Hackathon — DA-IICT: Represented team and built "Farma Assist," a farmer-focused digital assistance platform, competing against teams from top engineering colleges across Gujarat.

ACADEMIC QUALIFICATIONS

MCA — Big Data Analytics | Parul University, Vadodara | 2024–2026 | CGPA: 8.15
BCA | Atmiya University, Rajkot | 2024 | CGPA: 8.50
HSC | Gujarat Secondary Education Board | 2021 | 70%
SSC | Gujarat Secondary Education Board | 2019 | 67%
